

Saifeddine Makhlouf

Full-Stack Developer • React + Node.js + TypeScript • GenAI / LLM Integration

Tunis, Tunisia (Remote) • +216 20 099 922 • saifeddine.ben.makhlouf@gmail.com

saifeddine.tech • github.com/devmksaif

SUMMARY

Full-stack developer with 4+ years shipping production React + Node.js applications and GenAI / LLM integrations for international clients. Built and deployed 10+ products including a multi-channel chatbot SaaS serving 1,000+ users across 700+ businesses, and two React Native apps live on Google Play. ISET Djerba honors graduate (2026). Open to remote mid-level full-stack roles on EU product teams.

PROFESSIONAL EXPERIENCE

Full-Stack Developer / YOTSYSTEM • Full-time January 2026 – Present • Tunis, Tunisia (Hybrid)

Maritime tech company delivering AI-powered yacht management and digital transformation solutions.

- Build and own platform features across React, Node.js/TypeScript, and React Native within a 4-engineer team — running sprints and reviewing 100% of pull requests.
- Designed core backend architecture across PostgreSQL and MongoDB handling 50K+ API requests per day via REST and event-driven services.
- Built secure microservices, API gateways, and JWT/RBAC authentication flows powering production traffic for AI-driven yacht management features.
- Shipped a cross-platform React Native + TypeScript mobile app with real-time WebSockets and Firebase, integrated against the same Node.js backend.
- Set up GitHub Actions CI/CD with Docker, automating deployments across staging and production and cutting release time by ~60%.
- Delivered 5+ major platform releases working directly with C-level stakeholders on scope and timelines.

Software Engineering Intern (PFE) / Agora • Part-time, concurrent February 2026 – June 2026 • Tunisia

Full-stack cinema ticket booking platform — customer front office and admin back office.

- Built a responsive React.js front-end with reusable component architecture spanning customer booking and admin back-office flows (~25 screens).
- Engineered a Spring Boot + Hibernate backend across 12 relational entities, sustaining 10K concurrent booking sessions in load tests.
- Implemented Apache Kafka event streaming for real-time seat-locking, eliminating double-booking race conditions and reducing booking confirmation latency to under 100 ms.

Freelance Full-Stack & GenAI Developer / Upwork / Fiverr April 2022 – Present • Remote

Delivered 10+ production React + Node.js and GenAI projects for international clients across mobile, web, and SaaS.

- **CraftGent — SaaS GenAI Chatbot Builder.** Multi-channel LLM platform (web widgets, SMS, Discord, Instagram, Facebook) with real-time analytics, Stripe billing, and 100+ customisation options. Serves 1,000+ users across 700+ businesses. Stack: React, Node.js/Express, MongoDB, WebSockets, OpenAI GPT-4, Gemini.
- **JuliaBot — Multi-Agent GenAI Platform.** 7 specialised agents (Chat, Research, Medical, RAG, more), JWT-based RBAC, and 11-language i18n. Stack: Next.js 15, NestJS, PostgreSQL, TypeORM, Docker, Kubernetes, Stripe.
- **Calliverse — Social Networking App.** Real-time messaging, video calls, premium subscriptions. 1K+ downloads on Google Play. Stack: React Native, TypeScript, Node.js, Supabase, WebRTC, Clerk, Stripe.
- **Blink Delivery — Grocery App.** Cross-platform delivery with live order tracking, multi-address delivery, coupon engine, and offline support. 2K+ downloads on Google Play. Stack: React Native,

TypeScript, Node.js, WebSockets, Supabase, Stripe.

- **Africa Creative Talent Expo — FinTech App (in progress).** Cashback rewards, proprietary voting currency, and real-time transaction processing. Stack: React Native, Node.js/Express, Supabase, Clerk, WebSockets.

Software Engineering Intern / *TOPNET*

January 2025 – February 2025 • Tunisia (Hybrid)

Designed and built a no-code chatbot builder platform from scratch.

- Built a no-code chatbot builder platform from scratch using React.js, Node.js, and NLP APIs.
- Redesigned NLP conversation flows, increasing resolved chatbot queries without human escalation by 25%.

LANGUAGES & TECHNOLOGIES

Frontend: React.js, Next.js 15, TypeScript, Redux, Recoil, Tailwind CSS, MUI, Shadcn/UI

Backend: Node.js, Express.js, NestJS, REST, GraphQL, Microservices, WebSockets, JWT, OAuth 2.0, RBAC

GenAI / LLM: OpenAI GPT-4, Gemini, LangChain, RAG, Multi-Agent Systems, Conversational AI

Databases: PostgreSQL, MongoDB, MySQL, Redis, Supabase, Prisma, TypeORM

Mobile: React Native, Expo, EAS Build, WebRTC, Firebase, Push Notifications, Offline Sync

DevOps & Cloud: Docker, Kubernetes, GitHub Actions, GCP, AWS, Apache Kafka

Payments & Auth: Stripe, Clerk, JWT, OAuth 2.0, RBAC

Other: Spring Boot (Java), Python (FastAPI, Flask)

Programming Languages: JavaScript, TypeScript, Python, Java, C, C++

EDUCATION

Bachelor's Degree in Computer Science / *ISET Djerba — Higher Institute of Technological Studies*

2023 – June 2026 • Tunisia

Graduated with Honors

ACHIEVEMENTS & CERTIFICATIONS

- **National Winner** — IEEE AI Challenge (Cybersecurity & Machine Learning)
- Google Cloud Platform Fundamentals • Google Kubernetes Engine • React Native (Udemy)

SPOKEN LANGUAGES

English — C2 (Proficient) • French — C1 (Advanced) • Arabic — Native
